

CLAIMS

1. A method comprising:
transmitting at least a part of one or more mote-addressed content indexes.
2. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:
transmitting at least a part of at least one of a mote-addressed sensing index or a mote-addressed control index.
3. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:
transmitting at least a part of a mote-addressed routing/spatial index.
4. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:
effecting the transmitting with a reporting entity at a mote.
5. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:
effecting the transmitting in response to a schedule.
6. The method of Claim 5, wherein said effecting the transmitting in response to a schedule further comprises:
receiving the schedule.
7. The method of Claim 5, wherein the effecting the transmitting in response to a schedule further comprises:

deriving the schedule.

8. The method of Claim 5, wherein the effecting the transmitting in response to a schedule further comprises:

deriving the schedule at least in part from at least one of an optimized query or a stored query.

9. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:

effecting the transmitting in response to a query.

10. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:

encrypting utilizing at least one of a private or a public key.

11. The method of Claim 1, wherein said transmitting at least a part of one or more mote-addressed content indexes further comprises:

decoding at least a part of one or more mote-addressed content indexes utilizing at least one of a public key or a private key.

12. A system comprising:
means for transmitting at least a part of one or more mote-addressed content indexes.

13. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for transmitting at least a part of at least one of a mote-addressed sensing index or a mote-addressed control index.

14. The system of Claim 12, wherein said means for means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for transmitting at least a part of a mote-addressed routing/spatial index.

15. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for effecting the transmitting with a reporting entity at a mote.

16. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for effecting the transmitting in response to a schedule.

17. The system of Claim 16, wherein the means for effecting the transmitting in response to a schedule further comprises:

means for receiving the schedule.

18. The system of Claim 16, wherein the means for effecting the transmitting in response to a schedule further comprises:

means for deriving the schedule.

19. The system of Claim 16, wherein the means for effecting the transmitting in response to a schedule further comprises:

means for deriving the schedule at least in part from at least one of an optimized query or a stored query.

20. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for effecting the transmitting in response to a query.

21. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for encrypting utilizing at least one of a private or a public key.

22. The system of Claim 12, wherein said means for transmitting at least a part of one or more mote-addressed content indexes further comprises:

means for decoding at least a part of one or more mote-addressed content indexes utilizing at least one of a public key or a private key.

23. A system comprising:

a mote; and

means for transmitting at least a part of one or more mote-addressed content indexes, said means for transmitting proximate to a portion of said mote.

24. A system comprising:

at least one mote-addressed content index having at least one of a sensing index, a control index, or a routing/spatial index of a mote-appropriate device of a mote; and

at least one reporting entity resident on the mote, said at least one reporting entity configured to report at least a part of said at least one mote-addressed content index.

25. The system of Claim 24, wherein said at least one reporting entity resident on the mote further comprises:

a processor configured to transmit at least a part of said at least one mote-addressed content index.

26. The system of Claim 24, wherein the mote comprises:

at least one of a processor, a memory, or a communications device formed from a substrate.
